

# DCSG

DCSG is an open network cell site router built with merchant silicon that has decoupled (disaggregated) its software features from its hardware components. Here's everything you need to know about the DCSG.

## WHAT IS DCSG?

DCSG stands for Disaggregated Cell Site Gateway

## WHAT ARE THE BENEFITS OF DCSG?

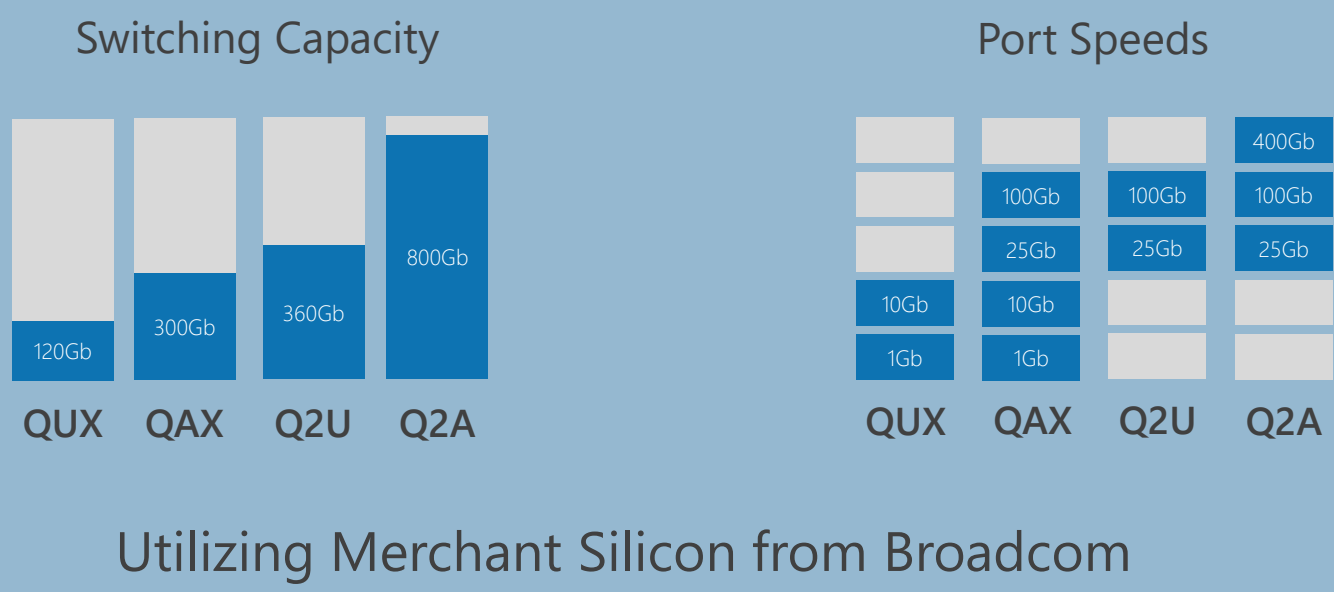

## WHY START FROM DCSG?

## UFISPACE DCSG FEATURES BY ASIC

**DID YOU KNOW?**  
UfiSpace's S9500-30XS was the first DCSG deployed in a live tier-one operator network.

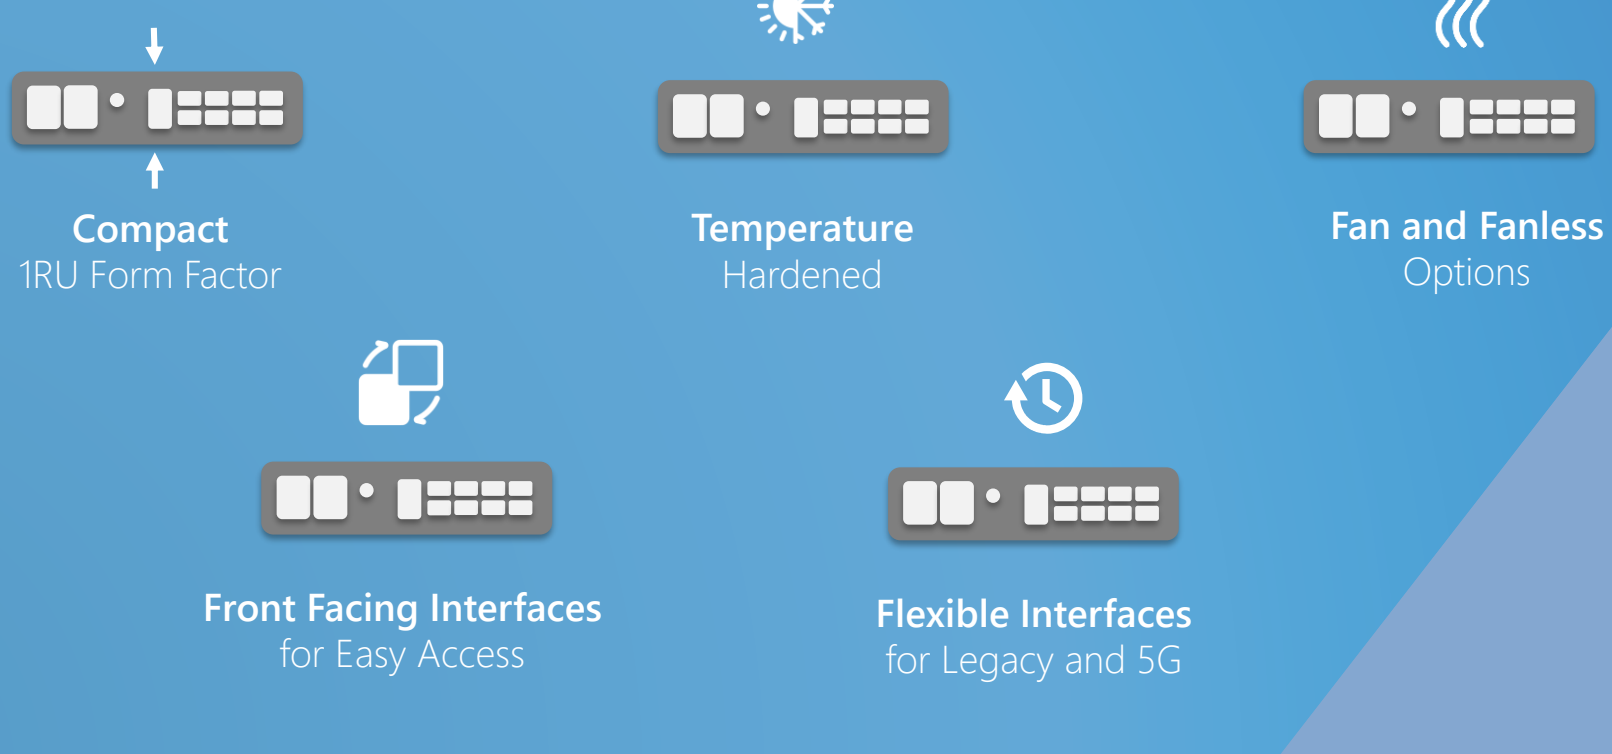

Utilizing Merchant Silicon from Broadcom

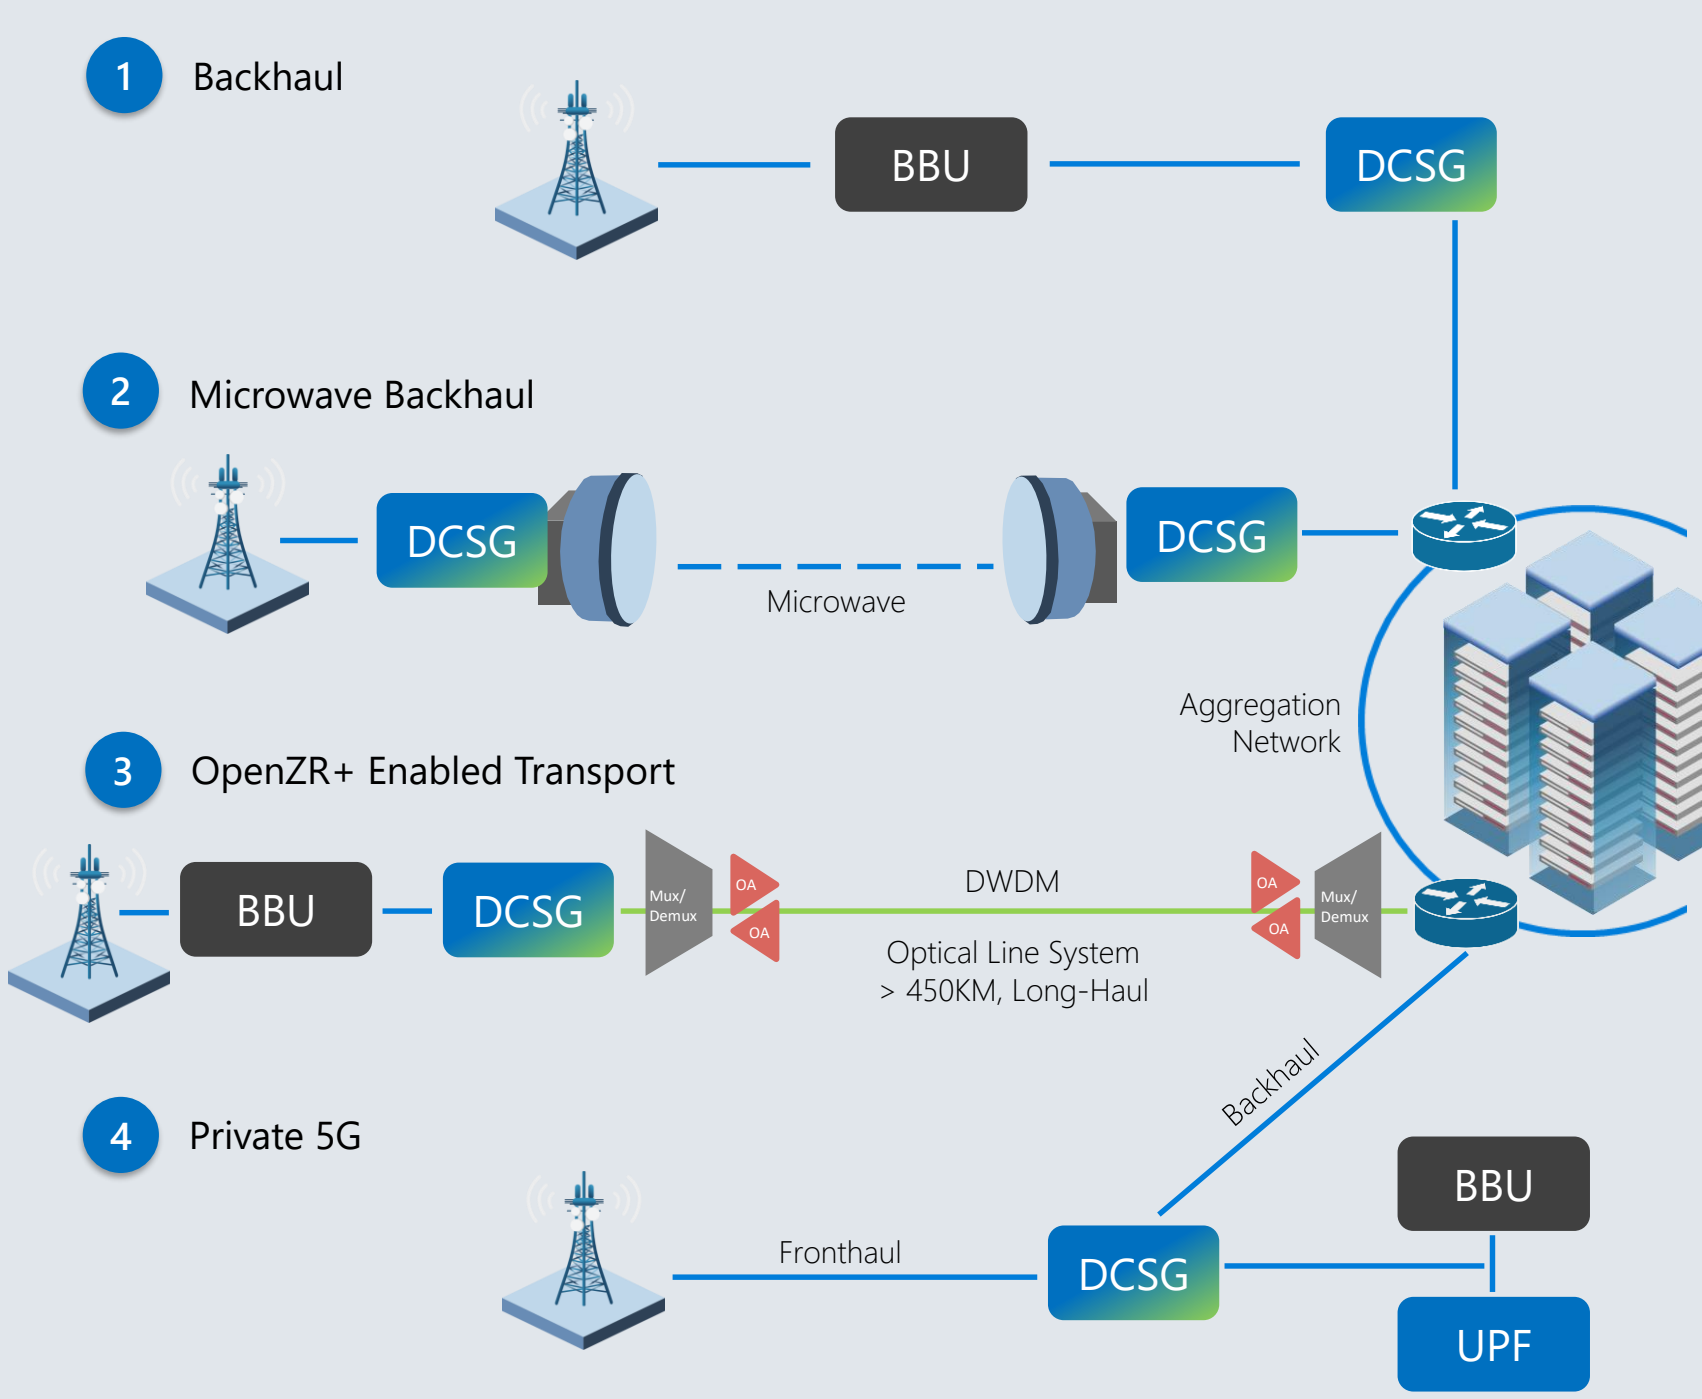

### 5G and Security Features

## PHYSICAL FEATURES EXPECTED FROM DCSG

## DCSG USE CASES

**About UfiSpace**  
UfiSpace provides end-to-end disaggregated networking solutions and is one of the pioneers in development of open core / edge routers. Our passion and dedication towards customer service and engineering excellence has brought UfiSpace to the forefront of 5G technology innovation.
